Why Should You Partner?

About the Energy Innovation Forum Canada 2023

SGIN Canada was founded to advocate for the many benefits of smart, clean energy in Canada. As a non-profit, member-driven industry network, we enable the decarbonization and electrification of Canada's Grid by supporting real implementation and providing centralized focus for knowledge, best practices and experiences from our leading smartgrid implementation communities.

SGIN Canada's 2023 Energy Innovation Forum Canada fosters collaboration across the Canadian energy sector and continues to challenge accelerating the pace of change and what it takes to unlock smart energy implementation.

Why should you partner with the Energy Innovation Forum Canada?

Our annual Energy Innovation Forum Canada continues to bring together smart energy leaders to accelerate Canada's low-carbon energy future. Our multi-sectoral delegates include leaders from utilities, vendors, regulators, communities, academia, and provincial and federal, representing all facets of the smart energy industry under one roof.

EIF is a high profiled opportunity to showcase your company, its products and services, and engage in meaningful discussions with other energy leaders from across Canada and internationally.

To accelerate the pace of change we need to be to be creative, innovative, and collaborative in implementing solutions to our climate change crisis, and we need stakeholders like you in the smart energy sector to help make that vision a reality.

On behalf of our members and stakeholders I invite you to join us as an EIF conference partner as one of Canada's energy leaders to meet the challenges ahead and advance our clean energy future.
